## PipeCut CNC pipe and profile cutting machine

- profile intersections, welding seam preparation and pipe marking • High-quality cutting with high-definition plasma as well as with standard
- air plasma sources
- · Meeting of comprehensive safety and environmental standards
- Excellent exhausting efficiency provided by an overhead extraction system, designed to meet the standards of high-speed plasma cutting
- Sharp angles and corners of cut parts as well as high contour precision resulting from helical rack and split helical pinion drives
- · Advanced height control for plasma cutting based on proprietary adaptive algorithms backed by ball screw actuated Z axis
- · Covers for protection of mechanical parts against fumes and damages
- Efficient and user-friendly PC-based CNC control system iMSNC®
  - Integrated database of tool parameters
  - Multi-tool operation
  - · Automatic assignment of tool parameters to processed material
  - Full network connectivity
  - · Remote diagnostics and assistance
  - · Parametrical dynamic piercing
  - · Monitoring of consumable life
  - · Advanced servicing software tools

 Modular design providing the possibilities of various machine variants as well as further expansion of the system according to customers requirement

• Wide application field in tank, pipeline and power plant constructions

Possibilities of automatic loading and unloading assure higher productivity
